SUMMARY

Business Analyst with 5+ years of experience supporting finance transformation, ERP reporting, and financial data integration initiatives in consulting and operational environments. Strong background in SQL, Power BI, and financial data validation, with hands-on experience partnering with Finance and Accounting stakeholders to streamline workflows, reconcile complex datasets, and enhance enterprise reporting. Experienced in advisory-driven environments supporting system modernization and integration efforts. Currently pursuing an MBA and M.S. in Applied Data Analytics.

WORK EXPERIENCE

Project Support Intern | Prestige School Solutions LLC | Remote Summer 2025

- Supported financial data integration processes across payroll and accounting systems.
- Designed ETL workflows using Python to standardize financial data for ERP reporting.
- Conducted data reconciliation and validation checks during system conversions.
- Built Power BI dashboards to support financial performance monitoring.
- Assisted in documenting financial processes and reporting logic to improve transparency and scalability.
- Collaborated with Finance and IT teams during reporting automation initiatives.

Graduate Assistant | Appalachian State University | Boone August 2024 to Present

- Supported financial tracking, budget analysis, research and reporting initiatives at the Finance, Banking and Insurance department.
- Developed reporting tools to assist leadership with decision-making using advance excel.
- Assisted in process documentation and data quality validation for academic financial initiatives using Excel and SharePoint.

Data Analyst I | Forvis Mazars | Accra, Ghana September 2020-July 2024

- Partnered with Finance and Accounting teams to analyze financial datasets and support advisory and transformation initiatives using Excel, Sage Intacct, Bill.com, Netchex and Monday.com
- Wrote SQL queries to extract, validate, and reconcile large financial datasets across multiple systems.
- Supported ERP and reporting modernization efforts by assessing current state reporting workflows and identifying improvement opportunities.
- Assisted in financial data consolidation and standardization across business units and client entities.
- Performed variance analysis, data validation, and reconciliation to ensure integrity during system transitions.
- Built Power BI dashboards to support leadership reporting and operational visibility.
- Contributed to documentation of data definitions, financial workflows, and reporting standards.
- Supported finance-focused client engagements in advisory and audit contexts, gaining exposure to M&A-related reporting structures.

Operations Manager | Dalion Royal Ent. Limited | Accra, Ghana July 2018-2020

- Analyzed operational and financial data to support budgeting, forecasting, and business planning.
- Managed payroll, tax filings, and compliance reporting using Excel and QuickBooks.
- Prepared analytical summaries and proposals to support client and management decision-making.
